

## Client:

Etisalat Egypt

## Project Title:

Expanding Cloudera CDP with more 5 nodes

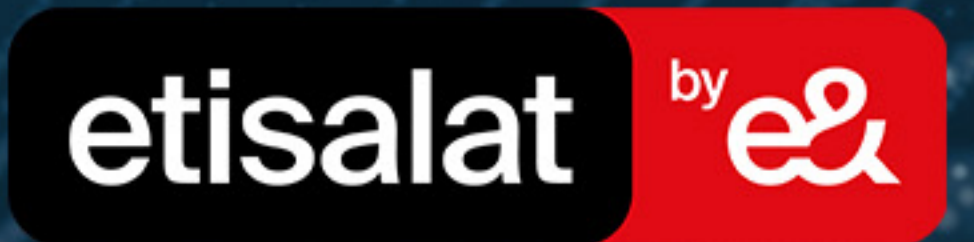

## Main Problem:

Etisalat Egypt

## Challenges:

- Old production setup with no documentations
- Strict project timeline
- Critical running system with live data, and limited down time windows

## Solution:

- BBI started with the cluster health check and prerequisite's implementation
- BBI studied the storage solution that Etisalat has, and customized the implementation plan accordingly

## BBI Advantage:

- Strong experience with huge volume of data management
- 100% focused in Telecom
- Solid Hands-on expertise with different Cloudera setups and use cases Implementation
- Flexible and results oriented Team

## Results/Outcomes:

- Successful project delivery in-time and with zero deviations after Cloudera health checks
- Very limited service-unavailability
